

Careers information – a guide for school staff

Incorporating careers information and guidance into lessons is a good way to improve motivation, raise aspirations and make lessons relevant.

The Senior Leadership Team will keep you informed about updates to government policy on Careers and what we are doing to meet these requirements. To provide the best careers programme possible you can support the Careers Programme by:

- Contacting Thomas Unwin or Ursula Gawthorn with any questions – email NovaCareers@novahreodacademy.org.uk .
- Going to Careers Pilot (<https://www.careerpilot.org.uk/job-sectors/subjects>) or Unifrog <https://www.unifrog.org> and clicking your subject area for up-to-date information to aid conversations with students about careers.
- Completing the annual survey on Careers in the Curriculum, which is sent out by the careers lead.

Careers in the curriculum has twin purposes:

- To promote students' career learning, development and wellbeing;
- To enhance students' subject learning and attainment and their overall personal and social development

The school will assess the impact of its careers programmes on students by surveying the views of students, parents and staff and analysing data in line with activities that have taken place in the school.
